Dedicated to those who served on 8 Squadron, Royal Air Force

Note:

This is a preliminary transcription

There will be errors in it, especially where the digital copy of the records was hard to read.

The "?" symbol is used where the film was unclear or where the transcript is suspect.

Names and initials are always a problem; not only are the records themselves inconsistent, but at time discerning between characters such as "F" and "P" is neigh impossible.

8 Squadron (Formerly No. 200 Squadron, R.A.F.)

Place	Date	Time	Summary of events
			May 1945. Compiled by F/O. D.P. Newport.
			Part. I. Operations.
			Operations continued during May, and up to May 15th, forty seven sorties were flown. Of these, thirty seven were successful, eight had to be abandoned owing to bad weather which made dropping stores on to a given target an impossibility. The other two were unsuccessful owing to the lack of reception and identification signals at the D.Z. Operational reports from the field showed that a very high standard of supplying dropping had been achieved, no adverse reports were received from the field. In all 159,000 lbs of stores were dropped on their respective targets, and 615 lbs of nickels.
			As during the month of April most of the sorties were carried out over Burma but a higher proportion (seven) of Malaya trips were allotted to the Squadron. Of these, all except two were successful, these last two being quite unavoidably prevented by bad weather over base and the forward refuelling point.
			Weather over Burma presented difficulties as the monsoon was beginning to make itself felt over the mountain areas where most of the D.Zs. were located. In almost every case aircraft reached the vicinity of the target only to find the area blanketed in Cumulus cloud – conditions which rendered supply dropping impossible.
			Operations ceased on May 15th as the Squadron was ordered to move to Ceylon to continue the work that had commenced at Jessore.
			Summary of Flying for May 1945.
			Operational Sorties. 47.
			Day Night Total
			Operational Hours Flown 361.52 70.14 432.06
			Non-Operational Flying. 92.20 8.55 101.15
			Total Flying 464.12 79.09 533.21
			Part II. Administration.
			Health & Welfare: The movement of the Squadron from Jessore to Minneriya, Ceylon, (recorded below) w.e.f. 21st May was enthusiastically welcomed. No-one was sorry to leave Jessore where the Squadron's health was poor and welfare practically nil. Last month's report under this heading will explain the delight experienced generally at arriving in Ceylon. Morale took an upward trend, and the more sanitary conditions coupled with the greater amenities particularly N.A.A.F.I., and a cinema adjacent to the Camp had an immediate beneficial effect on health both mental and physical. There is still a fair amount of sickness on the Unit, but it is considered that this is due to the carry-over effect of living in poor conditions at Jessore coupled with the fact that very few personnel have been enabled, because of the Squadron's activities, to take leave this year. Leave has now recommenced and it is anticipated that the Squadron's health will tend to improve.
			Sports. Only a few games of Soccer have been played, these being Squadron's representation games with other Units, there being no pitch available at Jessore for regular games.
			Entertainment. There were two shows provided at Jessore for a limited number of personnel. These were the Dave O'Gorman E.N.S.A. show and a welfare show. The former was well received.

			Part III. Movements.
			On the 21st of the month the Squadron at Jessore commenced a move to Minneriya, Ceylon, on authority of BARSEA Signal 0.105 dated 10.5.45. The St. Thomas Mount Madras detachment on the same authority commenced to move on the 25th. The majority of the personnel and a large proportion of the Squadron equipment at Minneriya were flown in the Unit's aircraft, all of which made return trips. By the 29th of the month all Squadron personnel and equipment (including the S.T.M. detail) had arrived at Minneriya. Owing to the shortage of accommodation and aircraft dispersals at Minneriya, all aircraft and maintenance personnel were accommodated at Sigiriya, all aircrew personnel remained at Minneriya. The Squadron Headquarters was established at Minneriya.
			Changes of Command.
			On the 12th the Commanding Officer W/C. G. McKenzie was posted to the Command of 160 Squadron. S/L. J.M. Milburn, Flight Commander with the Unit, was posted w.e.f. 12th May to the Command of the Unit.
			Change of Squadron Number.
			Authority was received during the month for the Squadron to take over the number plate 8 w.e.f. 15th May and to receive from the old 8 Squadron, Aden Command, Crest, Trophies, Squadron History etc.
			Personnel.
			F/L. D. F. Redrup was posted to the vacant S/L Flight Commander post on the 12th of the month.
			F/L. M. McKellar and crew arrived on posting from 354 Squadron on the 27th May.
			F/O. R. Camm was reposted to the F/L. Gunner G Gunnery leader post, w.e.f. 13.3.45.
			F/O. K.C. Price left the Unit on 13 May for posting to H.Q. ACSEA.
			S/L. R.C. Wescombe was posted to R.A.F. Element, SACSEA w.e.f. 17th.
			Decorations.
			Information was received during the month from Command H.Q. that F/O. F.W.T. Andrews who was with the Squadron in West Africa and who left the Unit (from India) in August 1944 had been awarded the Distinguished Flying Cross.
			Commissioning.
			W/O. L.F. Willis was commissioned in the rank of P/O w.e.f. 2nd December 1944.
			Short Leave to U.K.
			The remaining three airmen for the period of April to June F/S. Speake, Cpl. Groarke, and LAC. Matthews left for short leave in U.K. on the 6th June 1945.
			Part IV. General.
			Operations have continued very successfully throughout the month. Evidence of this is furnished by the following extract from the Air Commanders notes in the May 1945 issue of the Strat Air Force Monthly Bulletin.
			"The S.D. Squadrons have continued to operate at high pressure and with considerable success. During this last month they have completed a record number of missions. and have also had a record number of successes. No. 200 Squadron has been attached temporarily to the Strategic Air Force for S.D. Operations. I am afraid they will not be remaining with us very long, but they have already shown they are a first class Squadron, and during the past few weeks, have produced some very successful results."
			Squadron morale remains very satisfactory and the general impression that conditions and amenities at the new location of the Squadron would prove much superior to those obtained at its previous location has been borne out by experience.
			Wing Commander, Commanding, No. 8 Squadron R.A.F.

June 1945: Form 540

8 Squadron

Place	Date	Time	Summary of events
			June 1945. – Compiled by F.O. J.F. Moffatt.
			Part 1 – Operations.
			On the removal of the Squadron from Jessore to Minneriya, it was considered necessary to carry out consumption tests, before beginning operations, owing to the very long flights involved in carrying out S.D. ops. Group policy in connection with these operations, is to endure that each aircraft, as a safety precaution, will return to Base with a minimum of 350 galls. of fuel. Nine consumption tests were made before S.D. Operations began on June 10th. 1945.
			During the month, 13 Consumption Tests and 23 S.D. Operations were carried out. Of the Operations 17 to Malaya and one to Sumatra were successful. Two aircraft returned to Base owing to excessive fuel consumption, two had no reception at the D.Z.'s, and one was forced to return because of a defective fuel transfer pump.
			Most of the operations were carried out in adverse weather conditions en route, while conditions at the D.Z.'s were rarely satisfactory owing to low clouds over the mountains or ground mist on the low lying D.Z.'s.

			Part 2 – Administration.
			General: Administration of the Squadron with the aircrew part of it at Minneriya and the Ground personnel at Sigiriya has raised innumerable problems, chief of which have been the necessity to split up the appropriate trades in order to cope with the various domestic duties at both places. Further, with the Squadron HQ., at Minneriya, many admin., matters can only be cleared up by a personal visit from Sigiriya of the airmen concerned with a consequent loss in man hours. Conversely the division of the Squadron has involved periodical visits to Sigiriya by the C.O. and Adjutant, to clear up outstanding problems of general interest. Much of the official correspondence has had to be duplicated either completely or in some modified form, before despatch to Sigiriya. The rendering of certain returns etc., needed at short notice, has been made more difficult because it is necessary to repeat the information required to Sigiriya and then to await receipt from them of the return. This has thrown considerable strain on the very much reduced

			administrative staff, all of whom were and are still recovering from the effect of the two recent moves of the Squadron in April and May.
			At the cost of frequent periods of illness amongst the clerical staff, the administrative machinery has been kept moving so that for all practical purposes, the Squadron though in two pieces is working as a whole.
			Welfare. The Squadron welcomes the change of location and the varied amenities provided here. Film shows, ENSA shows, football matches etc., are all well patronised at Minneriya. Similarly at Sigiriya film shows are well attended, and there is keen interest in the sports league which functions there. The presence of NAAFI at both places is still a novelty to the Unit, and is considered a great boon. It is hoped that Sigiriya will soon be placed on the ENSA show itinerary.
			Morale: This is good, particularly at Sigiriya, which is a very happy Station. The morale of the personnel at Minneriya (nearly all aircrew) is high, chiefly as a result of the very satisfactory living conditions and the success achieved on operations.
			Leave: This was commenced for the first time for nearly six months, half way through the month. Unfortunately only a few ground personnel can be released at one time and this fact, naturally, was not greeted with enthusiasm. It has been possible to release two or three crews at one time for leave, and this has been much appreciated. In connection with Ground personnel leave, advantage was taken of the Hill Depot scheme and the Unit has been despatching 7 men every ten days to Redalla. This detachment leave has proved unpopular and difficulty is now being experienced in finding the required number every 10 days. In view of the fact, that at the present rate of progress, personnel may be able to take ten days leave only this year, they resent – when that leave comes along (for leave it is to them) to be forced to engage in small arms lectures for 2 ½ hours each morning.
			It is considered that in view of the shortage of leave accommodation on the Island, such Hill Depots should be "demilitarised" immediately. This Unit has been working at top pressure now for six months without a break, and it is felt that the resentment referred to above will be appreciated.
			Movements of Personnel.
			By the middle of the month 357 Squadron Detachment has grown to 8 crews.
			During the month F/Lt. R.G.I. Gardiner, the Squadron new Medical Officer arrived, and he took up his quarters at Sigiriya.
			F/O. R.A. Hobbs and Crew, after completing a tour, left on the 16th. for 185 Wing for D.D.T. spraying duties.
			F/O. R.H. Cook and Crew left on tour expiry, for U.K. on the 11th.
			F/O. J.C. Simpson (Nav.B.) left on the 21st for Special "N" Course at Shawbury, U.K.
			F/Lt. A.R. McAra (Unit Staff Navigator), left the Unit on the 21st. for a Post Graduate & Visitors Course at E.A.N.S. Shawbury, U.K.
			Commissions. Authority for the granting of commissioned ranks of P/O. to the undermentioned was received during the month.

July 1945: Form 540

8 Squadron

Place	Date	Time	Summary of events
			Minneriya: July 1945: Compiled by F/O. J. E. Sergeant.
			Part One – Operations.
			The Squadron operations reached a peak in July, 54 Sorties being made, 3 to Sumatra and the remainder to Malaya. Of these 38 were successful, many in poor weather, cloud covering hills which almost invariably surrounded the DZ's, and visibility in some cases from 0 – 2 miles. Of the sixteen unsuccessful missions, four were due to mechanical trouble, nine to bad weather at DZ or en route, but mainly at DZ as in only one instance did an aircraft return to base because of bad weather before DZ was reached, and three unsuccessful sorties were due to lack of reception at DZ. Altogether during July 108,172 lbs. of stores were lifted and of this amount 75332 lbs., were dropped, nearly all the remainder being brought back to base and 1577000 nickels were also dropped. In addition to this 30 bodies and 1 dog were dropped on Malayan DZ's. In only two case were stores jettisoned on unsuccessful trips, and one of these was due to the failure of one engine immediately after take off, and stores were jettisoned 3 miles from base. At the end of the month 8 new G.R. crews arrived from U.K., and the aircraft strength was increased to 13.
			Summary of Flying for July 1945

			Part Two – Administration
			General. During the month there was put into operation the Servicing Echelon scheme (taking effect officially from 13/6/45) whereby this Unit lost all but a few of its Maintenance personnel to the newly formed No. 7008 Servicing Echelon and the remainder of its ground personnel (domestic trades etc.) to RAF Minneriya. This 'split' raised new difficulties and in no small measure inconvenienced a Unit still recovering from two important moves in six weeks. The administrative Section, for instance, reduced as it was under the new Establishment to 1 Cpl. Clerk G.D., became even more overworked. The unit as a whole, while appreciating the principles of the Servicing Echelon scheme, did not welcome it. Since arriving at Minneriya the Unit owing to accommodation difficulties has been segregated into aircrew and Maintenance personnel – and it became necessary, therefore, to strive at all times to keep a proper liaison between the two to ensure the maximum unity of effort. The S.E. scheme, it was felt, could only result in an aggravation of the problem causing the Echelon personnel to take an even more impersonal interest in the aircraft they were servicing, and the crews who were flying them. Innumerable small annoying difficulties of this nature did arise in actual fact, but it says much for the fine spirit which existed on the Squadron that these were not allowed to interfere with the general organization, the very satisfactory maintenance of the aircraft, and the creditable success achieved by them and their crews.
			Morale: Morale of the Unit no doubt inspired by the increased success of operations by the Allies against the enemy remained good. (Not to mention our own successes)
			Welfare: The amenities on the Camp are considered quite satisfactory, frequent ENSA and GANG shows, with the normal cinema shows, being as always very popular.
			Sports: Sports facilities are adequate in view of the small amount of time available to personnel. The Squadron provided several entrants and winners for the successful Station Sports held during the month.
			E.V.T.: The Squadron does not now possess many devotees though a large number are

			taking correspondence courses. The advent of a Station Education Officer has proved very helpful and the E.V.T. scheme is now being put into effect.
			Mail: apart from the occasional 'lapse' or longish delay, mail is received mostly in short time from U.K. etc. and the mail position is considered to be satisfactory.
			Part Three
			Personnel – Movements: On 31st. of the month eight new crews ex U.K. (with Captains as under), arrived as replacements :-
			153110 F/O. H.J. Markley, 136210 F/Lt. E. Liddle, 153246 F/O. A.W. Walker, 152451 F/O. M. Mays, 177652 F/O. A.G. McCallum, 107220 F/Lt. J.P. Dunlop, 186657 F/O. T.H. Neilson.
			2 replacement Liberator crews arrived from 292 Squadron.
			F/O. J.S. Elliott (GD"S") left during the month for a Signals Leader's Course.
			F/O. W. Williams (GD AD) was attached to the Unit for non-flying F/Engineer duties.
			P/O. J.T. Irvine (F/Eng) left for Flight Engineers Leaders Course at No. 4 S. of T.T. U.K.
			Part Four.
			General. S.D. operations have continued very successfully throughout the month showing an average of just over 70% successful sorties. Frequent bad weather and some rather difficult DZ's have been successfully overcome in many cases, and on several occasions crews have spent some considerable time trying to locate DZ's before being forced to return to Base because of relatively small fuel safety margin.
			The arrival of the eight new crews was met with satisfaction by the present crews, as each individual will have more time off between trips, a major consideration in view of the duration of the present sorties.

Place	Date	Time	Summary of events
			28th of the month.
			Morale. It goes without saying, that the unconditional surrender of Japan, coming as suddenly as it did has done far more to merely boost morale to unprecedented heights. After six years of unceasing efforts, the goal has at last been reached and for the part that all have played, Victory is the reward. But as gratifying as victories of arms most certainly are, a further aspect arises which should not pass unrecorded. It is the fundamental lesson which, sub consciously, all have learned – that though the medium of combined effort and co-operation, co-ordinated by understanding and mutual feelings, any task can be accomplished, no matter how great or formidable it may be. This lesson if remembered, should do much to solve our reconstruction problems, and if fully exploited will form the keystone to resuscitation of our National life. The result of the General Election was, to many, highly satisfactory. Fresh hope and greater confidence has been instilled into that large percentage of the Squadron, particularly among the other ranks, who will eventually return to civil life under the Release Scheme. A point which undoubtedly deserves mention, from the aspect of morale.
			Sports. Play, as well as work, has continued with an equal amount of vigour and full advantage has been taken of the facilities available.
			Part Three.: Personnel.

		Part IV. General.
		To a Squadron which has played such a prominent part in the Japanese Campaign, the 15th August 1945, was indeed a historic occasion. As vague as the true position may have been on that date, the fact that the Japanese Emperor had accepted the Allied surrender terms was one of the greatest significance. Even so, though Victory had technically been achieved, commitments would permit no slackening of effort; nor was any slackening sought, for one and all are deeply suspicious of further trickery. Not until the last Jap., has been relieved of his arms or means of continuing resistance will it be felt that the fighting is over. Moreover, all are fully aware that even when the last shot has been fired a great volume of work remains to be done. It is not without a measure of pride that this Squadron looks forward its share of these responsibilities.

September 1945: Form 540

8 Squadron

Place	Date	Time	Summary of events
			September 1945. Operations. (Compiled by F/O. L. P. Ball)
			The cessation of hostilities had little or no effect on the operational duties of the squadron during the month of September, when the vitally important work of dropping men, food and medical supplies on P.O.W. Camps and other reception areas was continued.
			A total of 58 operational sorties (49 to Malaya and 9 to Sumatra) were carried out and 1019 hours flown. Of these missions, many of which were successfully completed in poor weather both at the dropping zone and en route, 54 were successful and 4 unsuccessful, the latter due to (1) U/S Automatic pilot. (2) Engine trouble. (3) Excessive cylinder head temperatures in 1 and 4 engines. (4) Fuel syphoning port bomb bay tank.
			In no instance did aircraft turn back because of bad weather.
			The percentage of successful sorties flown (93.1%) constitutes a new record.
			the process of education by Leaflets was intensified, and comprehensive cover of Malaya and Sumatra achieved, by the dropping of appropriate leaflets on all sizeable towns and villages within range.
			Summary of Operations for September 1945

			Leaflets Lifted 442,500 Leaflets Dropped 402,500.
			Part. II
			Administrative.
			There have been few points from the purely administrative aspect which deserve comment further than has been noted in previous summaries; although the increase in paper work has thrown heavier commitments on the already understaffed Orderly Room.
			With the slackening of operational flying a certain slackening in Service and Personal discipline made itself manifest among the N.C.O. aircrew. Immediate action was taken to rectify this and in order to keep the N.C.O.'s occupied, extensive training and Sports programme have been organised and when running properly should do much to short-circuit the decline.
			Quite probably, this has been brought about by a number of rather discouraging reports brought back by crews returning from operations. These showed that although drops were still being made, transport aircraft and other sources of supply were in the near vicinity of dropping zones. Furthermore, a crew returning from Singapore reported large numbers of full containers still left lying about the aerodrome a considerable time after their delivery.
			However, in spite of all this, discipline must be maintained and steps are being taken to meet that end.

October 1945: Form 540

8 Squadron

{Page one of the 540 for this month is missing from the PRO file}

Place	Date	Time	Summary of events
			Morale.. Morale has been a little uncertain owing to the rumours as to the future of the Squadron, but improved when it was announced that the Squadron was to be disbanded. The Training Programme which has been organised, has done much to occupy crews time and minds. The leave scheme has been in full swing.
			Sports. A very strong sports element has sprung up embracing most branches of sport.
			Release. The Government announcements on Release were not well received but when they were modified slightly it increased men's hopes; but there is still the unavoidable fact that some trades remain here while others are released. From a purely administration point of view it only remains to add to previous review, the much overworked Orderly Room does not look forward to the increased work that the disbandment of the Squadron will incur.
